

## Tidal Predictions 2024

## Tidal Predictions 2024

### Cautionary Note

The tidal predictions contained within are the predicted **depths of water** at High Water (HW) for Drogheda Port, River Boyne seaward approaches, river entrance and navigation channel to the Tom Roes Point terminal (TRP) and thereafter to the Drogheda Port Town Quays (TQ), ref: British Admiralty Chart (BA) 1431 for channel layout.

Ships Masters are always advised to seek clarification from the Harbourmaster of their nominated loading and or discharging berth location (TRP or TQ) in order to enable them to determine their appropriate safe maximum draft in advance of loading to or from Drogheda Port.

The following weather conditions may influence the tidal predictions (depths) for Drogheda Port - River Boyne – seaward approaches and river entrance:

- Northerly winds may reduce predicted depths while southerly winds may increase them.
- High barometric pressure may reduce the predicted depths.
- Storm events may reduce predicted depths at the seaward approaches and river entrance. This will occur particularly during periods of easterly to southeasterly storms when wave action will accelerate sediments transport at the seaward approaches and river entrance, particularly during the low water period, southeasterly storms having the greatest impacts.

Masters berthed at TRP & TQ, can observe the height of tide on the quay wall tidal gauges, ref: BA 1431 for berth and tide gauge locations.

It is believed D.S.T. will be kept between 31<sup>st</sup> March and 27<sup>th</sup> October, but these dates are provision. Times are given in D.S.T. between 31<sup>st</sup> March and 27<sup>th</sup> October, otherwise are given in U.T.C.

Tidal predictions for Drogheda Port have been computed by the UK National Oceanography Centre (copy right reserved).

Masters should note that these are predictions only. Masters should consult the tidal gauges in Drogheda Port for real time information before navigating into and from Drogheda Port. While particular care is taken in the preparation of these tidal predictions, Drogheda Port Company cannot accept any responsibility for any errors or omissions in these tidal predictions, or weather events which may affect depths of water.
